

Monitoring Violations Annual Notice

IMPORTANT INFORMATION ABOUT YOUR DRINKING WATER

Monitoring Requirements Not Met for EJ Water

On 1/16/25 we became aware that our system recently failed to collect drinking water samples. Although this incident was not an emergency, as our customers, you have a right to know what happened and what we did (are doing) to correct this situation.

We are required to monitor your drinking water for specific contaminants on a regular basis. Results of regular monitoring are an indicator of whether or not our drinking water meets health standards. During December 2024, we did not complete testing for LT2- Turbidity and E.coli, and therefore cannot be sure of the quality of our drinking water during that time.

What should I do?

There is nothing you need to do at this time. You do not need to boil your water or take other corrective actions. You may continue to drink the water. If the situation arises where the water is no longer safe to drink, you will be notified within 24 hours. We will announce any emergencies on local media outlets and social media.

What is being done?

We have changed partner laboratories for this testing to ensure best practices. We have also updated training to ensure sampling is completed on time and in compliance.

For more information, please contact Doug Baxter at 217-925-5566 or dbaxter@ejcoop.com

Please share this information with all the other people who drink this water, especially those who may not have received this notice directly (for example, people in apartments, nursing homes, schools, and businesses). You can do this by posting this notice in a public place or distributing copies by hand or mail.
